Section 303 District Boundaries

A zone boundary shown on the zoning maps as approximately following the center line of a street, a shoreline of a body of water, shall be construed as following such line. The following subsection establishes the regulations that apply in each zone. Any use designed as a “permitted use” may be commenced in the particular zone providing the standards established by this Ordinance are met. Unless a variance, special exception or action on an appeal from the administrative decision is required, the necessary permit may be issued by the Selectmen or their designee. Any use designated as a “special exception” may be commenced in the particular district only after approval by the Board of Adjustment. If a

specific use is not listed, then it is not allowed unless the Planning Board finds the use is sufficiently similar to an enumerated permitted or special exception use. General provisions pertaining to all zones are described in Article IV. In the event of any conflict between restrictions contained in Article VII, Floodplain Development and Article VIII, Airport and the restrictions of any underlying zone, the more restrictive shall apply.

The following chart lists those uses allowed in each zone. Those uses designed with a “P” in the various zones are permitted and allowed by right. Those uses designed “SE” are allowed only as a special exception as granted by the Zoning Board of Adjustment. A dash indicates that the use is neither permitted, nor allowed by special exception in the corresponding zone.
